Work Experience

Full-time Stock Manager | Maesot Packaging | April 2022 - May 2023
  - Coordinate with other departments within the organization, such as the sales department to provide updates on stock product status, or the production department to adjust production according to demand.
  - Planning and Controlling Stock: Strategically planning storage space and managing the storage of goods or raw materials in the stockroom using the ABC analysis method, ensuring that stock is readily available as per the organization's requirements. Additionally, summarizing the remaining stock balances at the end of each month and the final month of the year.
  - Managing Personnel: Supervising the team in the stock department, including coordinating with others in the organization, such as the sales and production departments.
